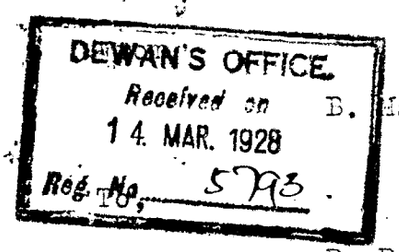
Office of the Sanitary Commissioner
with the Government of Mysore,

Bangalore Dated the 9th March 1928.

Sans 7-27-12



B. Mahomed Usmon Esq., L. M. & S.,
Sanitary Commissioner in Mysore, Bangalore.

R. Ranga Rao Esq., B. A., B. L.,
General Secretary to the Government of
H. H. the Maharaja of Mysore, Bangalore.

Sir,

I have the honour to report the outbreak of small-pox in Channapatna which has accounted upto date for a total of 25 attac with 14 deaths. The District Medical and Sanitary Officer has under my instructions proceeded to the town to organise an extensive campaign of vaccination and to see that all the unprotected children in the town are vaccinated speedily as possible. He has made a house to house visit and taken a correct census of the unprotected childrem. Vaccination is being done both at the Dispensary as well as by the Municipal Vaccinator, and 646 cases have been vaccinated from 1st January 1928 upto 9th March 1928. This may be said to be very fair progress. The District Medical and Sanitary Officer has been instructed to halt at the place and to arrange for the work being vigorously and systamatically carrie out.

I have the honour to be,

Sir,

Your most obedient servant.

M Usmon

Sanitary Commissioner M. G.

General and Revenue Secretariat | San File No. 7 of 192 7

Serial No. 88

From the Sanitary Commissioner no C. 462 of 19.10.28

Reports on ~~the~~ vaccination being neglected in several parts of the State & suggests that to prevent this, it is necessary to place the control of vaccination under the District Sanitary Officer.

2/ Subd. In connection with the prevalence of Small pox in the Cranganore, the Dewan was pleased to observe that "this shows how ~~about~~ vaccination has been neglected for years in all parts of the state" (para 1)

3/ The Sany Comr states that the neglect is due to (1) the responsibility ~~of~~ for the regulation of vaccination having been entrusted to the Presidents of local bodies (2) the vaccination not having been declared compulsory throughout the State. He suggests that

NOTE—Contn. sheet

Serial No.

with a view to guard against the first defect, it is necessary to entrust the control of the vaccinator to the Sanitary Officer. This system is stated to be in vogue in the Bangalore Dn.

The question of ~~control~~ enforcing vaccination throughout the State is separately under correspondence & the further reply of the Sanitary Commissioner about the specific ~~area~~ areas where Compulsory Vaccination is to be extended is awaited.

10) At present every District has not for a District Sanitary Officer the D.M.O. being also the D.S.O. further the area of a District is so large that ~~the D.S.O.~~ one single officer can not be in close touch with all the Vaccinators in the taluks. As it is, the Vaccinators are working directly under the Amildars who during their frequent tours in the limited area within the Taluk have better facilities of checking their work than the D.M.O. stationed at the Dt Head Quarters attached to a Dt Hospital in addition to other duties such as Dt Lock up etc.

From the President Dt. Bd. Hosur
No. PR 307-28 dt. 18.7.29.
States that the District Board consider that it is not desirable to place the vaccinators under the disciplinary control of District Law Officers.

38) Subd: This file relates to the question of placing the vaccinators under the disciplinary control of ~~Vaccinators~~ the District Law Officers.

39) In connection with the outbreak of Small pox in the Channapatna, in March 1928, Govt wanted to take who was responsible for the apparent neglect of vaccination. The Law Commissioner wrote that under the present state of affairs, the responsibility for the regulation & proper of vaccination as well as the disciplinary control vested entirely in the President of the Board

P. I Govt

Govt A.

NOTE—Contn. sheet

Serial No.

42) Dr Usmon's letter dated the 19th October 1928 deals with two matters.
(1) Extension of the Compulsory Regulation throughout the State, a
(2) Vesting the disciplinary control of the Vaccination staff in the District Sanitary officer

43) In regard to (1), detailed proposa in regard to the staff ~~required~~ and Vaccine required to cope with the large addition to the Vaccination wor have been called for from the San. Commr.

44) In regard to (2), in accordanc with the orders of the 3rd Member in parag: 14, the views of the Dist: Boards (except Bangalore) were calle for. The general trend of opinion expressed is that the existing arrange ment may continue under which the District Sanitary officer has only the ~~as~~ general supervision over the work of the District Vaccination staff and that disciplinary control if any, should be exercised by him only through the District Board.

45) Promotion of Vaccination is one of the obligatory duties of the District Boards and the appointment and control of vaccinators being vested

Note—Contn. Sheet

WD 01684—GPB—30,000—20-4-29

Serial No.

in them, they are averse to parting with such control. Both the Distt: Sanitary officers being ex-officio Health officers and Sanitary advisers to the District Boards, ~~they~~ can do all that the Sanitary Commissioner wants in regard to vaccination, without the control over vaccinators being made over to them. In fact if the Distt: San. officer could only prescribe the duties of the vaccinators & ask the D.B. to enforce them, they will certainly carry out his wishes. During his tours in the Distt: he can supervise the vaccination work and report to the Distt Board the principal defects noticed by him with suggestions for remedying them. With the appointment of Inspecting Health officers, the Sanitary Commissioner can get first hand information about the state of vaccination work in the Districts entrusted to their charge. 46/ In these circumstances, if the Distt: San. officers could only devote more time for the efficient supervision of vaccination work and bring defects to the notice of the Distt: Boards in time for remedying them, there need be no change

Board and its President shall of coarse reserve for themselves the full prerogative of exercising desciplinary control over all the service they pay fo including vaccinators and Sanitary Inspectors. In view of the foregoing observations and also in consideration of the important general question of protecting the State against the ravages of small-pox, Government should lay down a policy applicable to all the District Boards and at the same time frame rules for the guidance of the Sanitary Officers A set of draft rules are appended for approval.

54) The satisfactory working of the District Vaccination organisation will depend on the influence Presidents of the Boards and the Sanitary Officers are able to exercise over each other. When they are agreed on major points, work is easy and well done. Otherwise, an im-passe as in the present instance of Hassan, is inevitable.

55) Some of the part-time Sanitary Officers, may demur to undertake the added responsibilities in matters of sanitation and vaccination. Their objections will perhaps be the want of facilities. The District Boards having recognised this, have been moving, though somewhat slowly, to provide them. The officers will certainly have to put in more work and evince trifle more interest in its execution. These have to grow as a habit in them. Once responsibilities are thrust on them and they are made to recognise the importance of the position they occup in the District Board administration, any

part-time, shall make check inspections of each vaccinators work at least once in a year and when he is whole-time at least twice in a year.

6- The District Sanitary Officer shall prepare pay rolls of the Vaccinators and furnish the same with his recommendations regarding desciplinary action, to the President of the District Board.

7. The District Sanitary Officer shall see that each vaccinator works according to a programme and that suitable arrangements are made for prompt issue of takids.

8. The District Sanitary Officer in consultation with the President, of the District Board, shall organise for "Vaccination Drives" during epidemic of small-pox.

9. The District Sanitary Officer shall arrange to see that every vaccinator is equipped with proper kit, registers, forms, stationary &c.,

10. The District Sanitary Officer shall fix the monthly minimum work per vaccinator and his turn over for a year.

11. All correspondence between the vaccinator and the President, District Board, shall only be through the Sanitary Officer.

12. The District Board Sanitary Inspector shall prepare the programme of the vaccinator and see the sam with takids issued through the Amildar. He will send a copy of the programme to the Sanitary Officer for approval and confirmation.

Note

Placing vaccinators under the Disciplinary control of District Health or Sanitary Officers:-

---

In connection with the out-break of Small pox at Channapatna early in 1928, it was noticed that vaccination work was generally neglected in many parts of the State and the then Sanitary Commissioner who was consulted in the matter stated that as long as such a highly technical work as vaccination was under non technical control, viz. the President of the Local body, the state of things could not be expected to improve. He therefore urged that disciplinary control over vaccination staff should be handed over to the Sanitary Department, and that the District Health and Sanitary Officers should be made responsible for the progress and regulation of vaccination work. He added that such an arrangement was in force and worked successfully in the Bangalore District.

On these suggestions being referred to the District Boards for opinion, the District Boards of Tumkur, Mysore and Kolar stated that the advice of the Department ~~is~~ generally invited on all technical details of vaccination and that no change was called for. The District Boards of ~~Kolar~~ Kadur and Chitaldrug stated that technical supervision was being exercised in those Districts by the District Sanitary Officers

over the Vaccinators -

but that disciplinary control should vest in the Boards. The District Board of Shimoga accepted the proposals of the Sanitary Commissioner (now Director), being vested in subject to the general control ~~of~~ the President. The District Board of Hassan on the other hand were against giving any kind of control to the District Sanitary Officer.

The Director of Health who was there upon consulted is of opinion that it is highly desirable that the control of vaccination should be placed in the hands of the local Sanitary Officer responsible alike to the District Board and Health Department, the Presidents of District Boards reserving for themselves the full ~~power of exercising~~ desciplinary control over the service they pay for including vaccinators and Sanitary Inspectors. In this view he has forwarded a set of draft rules appended hereto for the guidance of Sanitary Officers ~~and urged~~ in regard to their responsibility for vaccination work.

Under the existing conditions a whole-time District Sanitary Officer where one exists, is practically an officer of the District Board in all but technical -- matters and there is no difficulty in such cases as in Mysore and Shimoga -- Districts for the D.S.O. to have complete control over ~~the~~ vaccinators subject to the general orders of the District Boards concerned. But in other districts, with only ex officio District Sanitary Officers the Dt.Boards may be averse to hand over

the control to them. But this objection can be met by appointing the District Sanitary Officer as a member of the Health Committee under section 33 (1) and (2) of the District Boards Regulation and to delegate to him the duties and powers of the Board in regard to control of vaccination subject ~~the~~ to any restrictions found necessary under the bye laws framed by them. The draft rules to give effect to the above proposals are for the consideration of the Committee.

9.3.32

Rules for the guidance of the District Sanitary Officers (both whole and part-time) and others in respect of vaccination work of the District Board.

-:0:-

1. The District Sanitary Officer shall be responsible for all vaccination work of the District Board.

2. All vaccinators of the District Board shall be placed and work under his control and they shall submit all their diaries and returns &c., to him.

3. The District Sanitary Officer shall make recommendations to and take orders of the President, District Board, in all matter relating to appointments, transfers, promotions and punishments of vaccinators.

4. The District Sanitary Officer shall compile returns of Vaccination for the whole district in his office and shall submit the same with reports to the President, District Board, who will forward them with his observations to the Sanitary Commissioner.

5. The District Sanitary Officer when he is part time, shall make check inspections of each vaccinator's work at least once in a year and when he is whole-time at least twice in a year.

6. The District Sanitary Officer shall prepare pay rolls of the Vaccinators and

furnish the same with his recommendations regarding desciplinary action, to the President of the District Board.

7. The District Sanitary Officer shall see that each vaccinator works according to a programme and that suitable arrangements are made for prompt issue of takids.

8. The District Sanitary Officer in consultation with the President, of the District Board, shall organise for "Vaccination Drives" during epidemics of small-pox.

9. The District Sanitary Officer shall arrange to see that every vaccinator is equipped with proper kit, registers, forms, stationary, &c.,

10. The District Sanitary Officer shall fix the monthly minimum work per vaccinator and his turn over for a year.

11. All correspondence between the vaccinator and the President, District Board, shall only be through the Sanitary Officer.

12. The ~~District Board~~ Sanitary Inspector shall prepare the programme of the vaccinator and see the same with takids issued, through the Amildar. He will send a copy of the programme to the Sanitary Officer for approval and confirmation.

13. The Sanitary Inspector shall systematically check each vaccinator's work; at least 30 per cent of the cases being verified in the course of a year, in 30 % of

villages itinerated by the Vaccinator.

14. The Sanitary Inspector shall examine and see that the Vaccinator maintains his registers and records correctly and up to date, that his kit is properly equipped and in order, that he carries the paste with care and he does vaccinations in a cleanly and correct manner.

15. The Sanitary Inspector shall see that the vaccinator submits his returns, diaries and reports ~~to the authorities concerned~~, in right time and regularly.

16. The Sanitary Inspector shall submit to the Sanitary Officer a brief report every month of his observations, on the work of Vaccinators checked by him.

17. In all matters pertaining to Vaccination and Vaccinators, the sanitary inspector shall correspond with or through the Sanitary Officer.

16/11

Proceedings of the standing Committee for Local Self Government and the Departments of Medicine, Sanitation and Public Health held on 22nd March 1932 in the Chambers of the Second Chamber of Council.

All the members were present.

The Senior Surgeon was also present by invitation.

The following subjects were considered: -

(1) Draft order regarding the completion of the organisation of the Bureaus of the Health Department.

This was agreed to.

(2) Placing Vaccinators under the Discipline Control of the District Health or Sanitary Officers.

The senior surgeon thought the rules proposed for the guidance of the District Sanitary Officers i respect of checking the vaccination work in the District could be worked only in Districts where the were wholetime Sanitary Officers. It was resolved that the rules (as revised at the meeting and append be recommended for adoption, only in such Districts and that the xxx case of the other Districts be cons dered at the next meeting.

It was also resolved that a recommendation may be sent to all the District Boards to have a complement of reserve vaccinators in view of a severe epidemic of small pox that may be apprehended this year.

(3) A revised scheme for the free distribution of quinine in the Malnad.

B. Mahomed Usmon, Esq., L. M. & S.,
Sanitary Commissioner with the Government of
His Highness the Maharaja of Mysore, Bangalore.

To

R. Ranga Rao, Esq., B.A., B.L.,
General Secretary to the Government of (exp) Mysore
His Highness the Maharaja of Mysore, ~~Bangalore~~.

Sir,

With reference to your letter No; G. 10689/Sany. dated 17th March 1928 observing that vaccination has been neglected in several parts of the State, I have the honour to state that in accordance with Government Order No. 5044-63/San.68-16-6 dated 9th March 1918 the responsibility for the regulation and progress of Vaccination as well as the disciplinary control vests entirely in the Presidents of local bodies. As long as such a highly technical work is placed under non-technical supervision, the State of things cannot be expected to improve with the net result that a controlable disease like Small-pox will not only smoulder but, suitable opportunity occurring, spends in waves of epidemics causing untold misery to children and al swelling the mortality. I would therefore urge that the disciplinary control of the vaccination staff be handed to the Sanitary Department, the District Health and Sanitary Officers being made responsible for the progress and regulation of the work. Further, it is also necessary in order to enforce vaccination, that the Compulsory Vaccination Act should be extended all over the State. In support of the first statement I may cite the step that is being adopted by the District Board, Bangalore, who have recently placed the Vaccinators under the control of the District Sanitary Officer. The District has been divided into circles, a vaccinator being assigned to each circle. Programme of work for each month is sent in advance, and over and above the scrutiny that is exercised by the Sanitary Inspectors, the District Sanitary Officer conducts test checks. In the event of a report of Small-pox he conducts " Vaccination drives" thus protecting

Gen 3280
Ex-officio
Gen 3280

protecting the area against Small-pox. Further, for each Village Panchayet a list of unprotected children is prepared and maintained for successive months. The correct maintenance of lists of unprotected children is essential for the satisfactory progress of vaccination in villages. The Deputy Commissioners should not only issue strict orders to the Patels but should also call upon every inspecting Officer of the Revenue and Sanitary Departments to scrutinise the lists, and report whether the duty of maintaining them is efficiently performed.

The vaccinator visits the village, rounds up the children according to the list, performs vaccinations unless they are otherwise ill, and ticks against the names of children who have been vaccinated. By such a system, the time of the vaccinator is not unnecessarily spent in unearthing the unprotected children. By the introduction of such a system, not only more efficient vaccination is secured but also the number protected has steadily increased, and sporadic events are nipped in the bud, and prevented from assuming epidemic proportions, I would therefore strongly urge that a system such as is in vogue at present in Bangalore District viz., of placing the control of vaccinators under the District Sanitary Officer, be extended throughout the State. It is also equally necessary that Compulsory Vaccination Regulation should be extended throughout the State.

I have the honor to be

Sir,

Your most obedient servant,

Mhamood

S i r,

With reference to your letter No. G. 6223-9/San.7-27-89 dated 22-11-28 forwarding copy of letter No. C. 462 dated 19-10-28 from the -- Sanitary Commissioner in Mysore about pushing on vaccination work in the State and requesting views of the District Board on the proposal of -- placing vaccinators under the control of the District Sanitary Officer etc., I have the honour to state that the subject was considered at length by the Stahding Committee of the District Board at their meeting held on 30-11-28, and they resolved that the arrangement now in force in the -- District may be explained and that there is no need for a change. They are further not in favour of the proposal now placed before them.

This resolution of the Standing Committee was subsequently approved by the Board at their meeting held on 1-12-28.

Copies of the resolutions passed by the Standing Committee and the Board in the matter are herein enclosed for reference.

A note explaining the arrangement now in force in the District is also herewith sent for perusal as resolved by the Standing Committee.

I have the honour to be,

Enclosure No.

Subject.

Extract from the proceedings of the meeting of the District Board, Tumkur, held in the Deputy Commissioner's Office on Saturday the 1st December 1928 at 12 noon.

Subject No. 38.

Letter No. G. 6223-9/Sany. 7-27-89 dated 22-12-28 from the General Secretary to Government requesting views of the District Board on the proposal of placing vaccinators under the control of the District Sanitary Officer and the office note put up by the Vice President of the Board on the subject, and the resolution of the Standing Committee dated 30-11-28.

Resolution:- The resolution of the Standing Committee is sanctione

---

against their names as they are vaccinated. This is being done in many places, although want of proper registers comes against its being properly maintained. The Superintendent, Government Press is being repeatedly requested to supply sufficient number of registers so that each village may have its own register. The compilation of the unprotected children can never be successfully achieved unless and until the Patels of villages heartily cooperate in the matter.

Previously the vaccinators were under the direct control of the Taluk Boards and their work was being supervised by a -- Deputy Inspector of vaccination. After the abolition of the post of Deputy Inspector of vaccination and of the Taluk Boards the vaccinators came directly under the control of the District Board. It was with the object of exercising more efficient -- control over the vaccinators that the number of Sanitary Inspectors in the District was increased from 1 to 6 so that the five newly appointed Sanitary Inspectors may be in charge of two --

Taluks

Taluks each. The work of the vaccinators is now being more efficiently supervised, as is apparent from the fact that the number of vaccinations has now considerably increased. Surprise visits are also paid by the Vice President of the District Board to test the vaccinations. Programme of work is prepared in advance and the vaccinators are generally made to adhere to the programme.

In many villages people, out of ignorance, refuse to have their children vaccinated on various grounds. Very many times they are not amenable to reason, and the vaccinator has to return after wasting a lot of time in persuation. Good work can be accomplished only if compulsory vaccination is introduced into all local areas without exception.

The District Board has already resolved to request Government to make vaccination compulsory throughout the District. The Government have not yet passed orders in the matter.

All questions of a technical nature regarding vaccination are referred to the District Medical and Sanitary Officer and his advice obtained and acted upon.

This is the present state of affairs regarding vaccination in this District.

The present reference by Government is to ascertain the view of the Board about placing vaccinators under the control of the District Sanitary Officers. The reasons mentioned by the Sanitary Commissioner in his letter addressed to Government are:-

1) Highly technical nature of the work.
2) Non-introduction of compulsory vaccination throughout the state.
3) Success in vaccination work in Bangalore District where vaccinators are placed under the control of the District Sanitary Officer.

and the remedy proposed by the Sanitary Commissioner is that the disciplinary control of the vaccintion staff be handed over to the Sanitary Department, the District Health and Sanitary Officers being made responsible for the progress and regulation of the work.

The present District Medical Officer who is also District Sanitary Officer of the District, is, as already stated, being consulted on all technical matters. There is also nothing to prevent him as the Sanitary advisor of the Board to check the work of vaccinators and to make all the suggestions that he deems neces-

sary

necessary in this connection, and he is actually doing this part of the work now.

Now taking the first ground of the Sanitary Commissioner about the highly technical nature of the work, the work of the vaccinators is not so highly technical as to be impossible of control by the Board. The work is such as can without doubt be controlled by the officers of the Board. In fact even according to the recommendation of the Sanitary Commissioner, it is the Sanitary Inspectors of the Board that have to primarily control and supervise the work of the vaccinators. The District Sanitary Officer's work is to conduct " Test checks " in ordinary times and " vaccination drives " in the event of a report of small-pox. This the District Medical and Sanitary Officer can do even now as already stated without the disciplinary control being transferred, and has been actually doing too. Even if a separate District Sanitary Officer is appointed, he will no doubt be an officer of the Board so far as vaccination is concerned and his services may be utilised by the Board in all matters connected with vaccination.

Regarding the second point, the resolution of the Board urging that vaccination may be made compulsory throughout the District is awaiting sanction by Government.

In these circumstances, the control over vaccinators -- need not be transferred to the Sanitary Department.

M. Venkatarama

Statement showing the number of vaccinators in the District, the areas allotted to each and the minimum number of vaccinations of each.

Sir,

With reference to your letter No. G. 6223-9/Sany.7-27-89 dated 27-11-28 inviting the opinion of the District Board in the matter of placing vaccinators under the control of the District Sanitary Officer as in the Bangalore District, I have the honor to state that the matter will be placed before the District Board at their next meeting to be held on 5-1-1929 and their resolution submitted to the Government soon after.

I may state here for your information that after the appointment of the District Medical Officer as District Sanitary Officer also, the vaccination Department has been completely placed under his supervision and control and he is made responsible for the regulation and progress of vaccination work. Their work and accounts are checked by him and their transfers, promotions and punishments are made according to the recommendations received from him. The Deputy Inspector of Vaccination, who has been appointed by the District Board is also placed under the control of the District Medical and Sanitary Officer.

The 22 Vaccinators of this District have been allocated as noted in the margin and this allocation has been in

General Secretary to the Government of His
Highness the Maharaja of Mysore, Bangalore.

1560

DEPUTY COMMISSIONER'S OFFICE. 20 JULY 1929 HASSAN

THROUGH THE DEPUTY COMMISSIONER, HASSAN DISTRICT.

Sir,

With reference to your letter No.G.6223-9/Sany. 297-27-89, dated 22nd Novr.28 calling for the views of the Board on the proposal of placing vaccinators under the control of the District Sanitary Officers, I have the honor to state that the question was considered in detail by the Board at their meeting held on 7th and 8th May 1929 and the Board approved of the resolution of the standing committee which resolved that this is not a desirable change and that the District Sanitary Officer may issue necessary instructions through the District Board President for needful action.

In this connection, I wish to bring to the kind notice of the Government, tnat the system of dividing the District into circles placing one Vaccinator in charge of every circle; getting the programme of Vaccinators in advance every month through the Sanitary Inspectors and scrutinising the work of the Vaccinators by the Sanitary Inspectors, is being adopted by the District Board in this District, without the intervention of the District Medical and Sanitary Officer. Besides, the District Board Sanitary Inspectors who ~~have~~ are all given

Ranges are specially trained in Vaccination, at Bangalore and as such they can supervise the work locally more efficiently.

Without the vaccinators being placed under the control of the District Medical and Sanitary Officer, the latter as Health Officer of the District may co-operate by, checking the work of the Vaccinators, just as he can do with regard to the work of the Sanitary Inspectors, and also about other health matters in the District. At Bangalore there is a separate Health officer for the District and as such he has got full powers to check the work of the District Board Sanitary Inspectors and Vaccinators and in all matters connected with the Health Administration of the District. If the same system be introduced in other Districts, where separate Health Officers are not appointed, system I am afraid may not work well, in as much as the supervision of the Vaccination work by the District Board Sanitary Inspectors who are District Board employees, might become slack and the inspection of the vaccinators work by the District Medical and Sanitary Officer who has no other executive Subordinates under him might become ineffective, as this inspection cannot but be indifferent. In a way a dual control is not desirable and the proposal of the Sanitary Commissioner will only lead to complications and does not appear to be an improvement at all.

A copy of the resolution of the Board is enclosed.

I have the honor to be,
Sir,
Your most obedient servant,

President,
District Board, Hassan.

ORDER NO. G. 9181-91

Dated, Bangalore, the 20th ~~April~~ May 1932.

In connection with the outbreak of small-pox in Channapatna early in 1928, it was noticed that vaccination work was generally neglected in many parts of the State and the then Sanitary Commissioner was asked to state who was responsible for such a state of things. The Sanitary Commissio (now Director of Health) ~~explained~~ that under the Government Orde dated 9-3-1918 read above, the responsib lity for the regulation and progress of

of vaccination in the Districts, as well as the disciplinary control over the Vaccinators vested entirely in the Presidents of Local Bodies and that the Department had no control over the work of the Vaccinators. He was of opinion that as long as such a highly technical work was under non-technical supervision, it was difficult to show improvement in vaccination work. He therefore urged that disciplinary control over the vaccination staff should be handed over to the Sanitary Department, the District Health and Sanitary Officers being made responsible for the progress and regulation of the work. He added that such an arrangement was in force and worked successfully in the Bangalore District.

On these suggestions being referred to the District Boards for opinion, the District Boards of Tumkur, Mysore and Kolar have stated that under the existing practice the advice of the Department is generally invited on all technical details of vaccination and that no change is called for. The District Boards of Kadur and Chitaldrug report that technical supervision is now exercised in those Districts by the District Sanitary Officer but that disciplinary control should vest in the Boards. The District Board of Shimoga accept the proposals of the Sanitary Commissioner subject to the general control of the President. The District Board of Hassan, on the other hand, are not in favour of giving any kind of control to the District Sanitary Officer.

The Director of Health, who was again consulted, is of opinion that in view of the fact that vaccination work in the District is not a mere local problem but that it has an important bearing on the health of the country as a whole, it is highly desirable that the control over should be placed in the hands of the local Sanitary Officer responsible alike to the District Board and the Health Department, the Presidents of the District Boards reserving to themselves the full power of exercising disciplinary control over the services they pay for, including Vaccinators and Sanitary Inspectors. In this view, he forwarded a set of rules for the guidance of Sanitary Officers in regard to their responsibility for vaccination work.

The question was placed before the Standing Committee of R.A. and L.C. for Local Self Government and Departments of Medicine, Sanitation and Public Health at their meeting on the 22nd March 1932, and it was resolved that the accompanying rules as revised by the be recommended for adoption for the present only in such of the Districts as have whole-time District Sanitary Officers.

Under Sec 45 (1), Cl(e) of the District Board Regulation, the appointment and control of vaccinators vest in the Dt. Bd subject to such exceptions and conditions as the Government may from time to time make and impose. In view of the strong reasons given by the Director in favour of placing the Vaccinators under the direct control of

Rules for the guidance of the District Sanitary Officers (whole-time) and others in respect of vaccination work of the District Board.

---

1. The District Sanitary Officer shall be responsible for all vaccination work of the District Board.

2. All vaccinators of the District Board shall be placed and work under his control and they shall submit all their diaries and returns etc., to him.

3. The District Sanitary Officer shall make recommendations to the President, District Board, in all matters relating to transfers, promotions and punishments of vaccinators. Appointments of vaccinators shall be made by the Presidents after consulting the District Sanitary Officers.

4. The District Sanitary Officer shall compile returns of vaccination for the whole district in his office and shall forward the same with his report to the President, District Board, who will forward them with his observations to the Director of Health.

5. The District Sanitary Officer shall make check inspections at least twice a year of each vaccinator's work.

6. The District Sanitary Officer shall prepare pay rolls of the Vaccinators and furnish the same with his recommendations regarding disciplinary action to the President of the District Board.

7. The District Sanitary Officer shall see

that each vaccinator works according to a programme and that suitable arrangements are made for prompt issue of takids.

8. The District Sanitary Officer in consultation with the President of the District Board shall organise for "Vaccination Drives" during epidemics of small pox.

9. The District Sanitary Officer shall arrange to see that every vaccinator is equipped with proper kit, register, forms, stationery etc.,

10. The District Sanitary Officer shall fix the monthly minimum work per vaccinator and his turn-over for a year.

11. All correspondence between the vaccinator and the President, District Board, shall only be throug the District Sanitary Officer.

12. The Sanitary Inspector shall prepare the programme every month, of the vaccinator and see the same with takids issued, through the Amildar. He will send a copy of the programme to the District Sanitary Office for approval and confirmation.

13. The Sanitary Inspector shall systematically check each vaccinator's work, at least 30 per cent of the cases being verified in the course of a year, in 30 per cent of villages itinerated by each vaccinator.

14. The Sanitary Inspector shall examine and see that the vaccinator maintains his registers and records correctly and up-todate, that his kit is properly equipped and in order, that he carries the paste with ea and he does vaccinations in a cleanly and correct manner

15. The Sanitary Inspector shall see that the vaccinator submits his returns, diaries and reports in

right time and regularly.

16. The Sanitary Inspector shall submit to th District Sanitary Officer a brief report every mont of his observations, on the work of vaccinators check by him.

17. In all matters pertaining to vaccination and vaccinators, the Sanitary Inspector shall corres pond with or through the District Sanitary Officer.

Memo.No. G. 7181-91/San.7-27-107

Bangalore, the 20th May 1929.

~~In communication with~~

The Sanitary Commissioner (now Director of Health) stated that under the Government Order dated 9th March 1916 read above, the responsibility for the regulation and progress of vaccination in the districts as well as the disciplinary control over the vaccinators rested entirely in the Presidents of Local Boards and that the Department had no control over the work of the Vaccinators. He was of opinion that so long as such a wholly technical work was under non-technical supervision, it was difficult to show improvement in vaccination work. He therefore urged that disciplinary control over the vaccination staff should be handed over to the Sanitary Department, the District Health and Sanitary Officers being made responsible for the progress and regulation of the work. He added that such an arrangement was in force and worked successfully in the Bangalore District.

On these suggestions being referred to the District Boards for opinion, the District Boards of Tumkur, Mysore and Kolar have stated that under the existing practice the advice of the Department is generally invited on all technical details of vaccination and that no change is called for. The District Boards of Bellary and Chitaldrug report that technical supervision is now exercised in these districts by the District Sanitary Officer but that disciplinary control should vest in the Boards. The District Board of Shimoga accept the proposals of the ~~Sanitary Commissioner~~ Director of Health subject to the general control of the President. The District Board of Kanara, on the other hand, are not in favour of giving any kind of control to the District Sanitary Officer.

The Director of Health, who was again consulted, is of opinion that in view of the fact that vaccination work in the district is not a mere local problem but that it has been an important bearing on the health of the country as a whole, it is highly desirable that the control over it should be placed in the hands of the local Sanitary Officer responsible alike to the District Board and the Health Department, the Presidents of the District Boards reserving to themselves the full power of exercising disciplinary control over the services they pay for, including Vaccinators and Sanitary Inspectors. In this view, he forwarded a set of rules for the guidance of Sanitary Officers in regard to their responsibility for vaccination work.

The question was placed before the Standing Committee of the Representative Assembly and Legislative Council for Local Self Government and Departments of Medicine, Sanitation and Public Health at their meeting on the 22nd March 1922, and it was resolved that the accompanying rules as revised by them be recommended for adoption for the present only in each of the Districts as have whole-time District Sanitary

officers.

Under Section 40 (1), Clause (c) of the District Board Regulation, the appointment and control of vaccinators vest in the District Board subject to such exceptions and conditions as the Government may from time to time make and impose. In view of the strong reasons given by the Director in favour of placing the Vaccinators under the direct control of the District Sanitary Officers, Government direct that the scheme of placing the District Vaccination staff under the control of the District Sanitary Officers to given effect to for the present only in the Mysore and Shimoga Districts.

Under Section 100, Clause (g) of the same Regulation, they are also pleased to sanction the accompanying rules as revised by the Standing Committee for the guidance of the District Sanitary Officers of the above two Districts.

The Committee have also suggested that a recommendation should be sent to all District Boards to appoint sufficient number of reserve vaccinators in their respective districts in view of the next severe epidemic of small-pox apprehended sooner or later.

Government trust that the District Boards will take necessary action in this direction without loss of time.

Rules for the guidance of the District Sanitary Officers (Whole-time) and others in respect of vaccination work of the District Board.

---

1. The District Sanitary Officer shall be responsible for all vaccination work of the District Board.

2. All vaccinators of the District Board shall be placed and work under his control and they shall submit all their diaries and returns etc., to him.

3. The District Sanitary Officer shall make recommendations to the President, District Board, in all matters relating to transfers, promotions and punishments of vaccinators. Appointments of vaccinators shall be made by the Presidents after consulting the District Sanitary Officers.

4. The District Sanitary Officer shall compile returns of vaccination for the whole district in his Office and shall forward the same with his report to the President, District Board, who will forward them with his observations to the Director of Health.

5. The District Sanitary Officer shall make check inspections at least twice a year of each vaccinator's work.

6. The District Sanitary Officer shall prepare pay rolls of the Vaccinators and furnish the same with his recommendations regarding disciplinary action to the President of the District Board.

7. The District Sanitary Officer shall see that each Vaccinator works according to a programme and that suitable arrangements are made for prompt issue of tokids.

8. The District Sanitary Officer in consultation with the President of the District Board shall organize for "Vaccination Drives" during epidemics of small-pox.

9. The District Sanitary Officer shall arrange to see that every vaccinator is equipped with proper kit, register, forms, stationery etc.,

10. The District Sanitary Officer shall fix the monthly minimum work per vaccinator and his turn-over for a year.

11. All correspondence between the vaccinator and the President, District Board, shall only be through the District Sanitary Officer.

12. The Sanitary Inspector shall prepare the programme every month, of the vaccinator and see the same with tokids issued, through the Village. He will send a copy of the programme to the District Sanitary Officer for approval and confirmation.

13. The Sanitary Inspector shall systematically check the each vaccinator's work, at least 20 per cent. of the cases being verified in the course of a year.

in 20 per cent of Villages itinerated by each Vaccinator.

14. The Sanitary Inspector shall examine and see that the Vaccinator maintains his registers and records correctly and up-to-date, that his kit is properly equipped and in order, that he carries the lasts with care and he does vaccinations in a cleanly and correct manner.

15. The Sanitary Inspector shall see that the vaccinator submits his returns, diaries and reports in right time and regularly.

16. The Sanitary Inspector shall submit to the District Sanitary Officer a brief report every month of his observations, on the work of vaccinators checked by him.

17. In all matters pertaining to vaccination and vaccinators, the Sanitary Inspector shall correspond with or through the District Sanitary Officer.

Hassan P. R. 307—28-29, dated 18th July 1929.
Chitaldrug C. 190—L. F. 28-29, dated 2nd February 1929.

ORDER NO. G. 9181-91—SAN. 7-27-107, DATED BANGALORE, 20TH MAY 1932.

The Sanitary Commissioner (now Director of Health) stated that under the Government Order, dated 9th March 1918, read above, the responsibility for the regulation and progress of vaccination in the Districts as well as the disciplinary control over the Vaccinators vested entirely in the Presidents of Local Bodies and that the Department had no control over the work of the Vaccinators. He was of opinion that as long as such a highly technical work was under non-technical supervision, it was difficult to show improvement in vaccination work. He therefore urged that disciplinary control over the vaccination staff should be handed over to the Sanitary Department, the District Health and Sanitary Officers being made responsible for the progress and regulation of the work. He added that such an arrangement was in force and worked successfully in the Bangalore District.

On these suggestions being referred to the District Boards for opinion, the District Boards of Tumkur, Mysore and Kolar have stated that under the existing practice, the advice of the Department is generally invited on all technical details of vaccination and that no change is called for. The District Boards of Kadur and Chitaldrug report that technical supervision is now exercised in those Districts by the District Sanitary Officer but that disciplinary control should vest in the Boards. The District Board of Shimoga accept the proposals of the Director of Health subject to the general control of the President. The District Board of Hassan, on the other hand, are not in favour of giving any kind of control to the District Sanitary Officer.

The Director of Health, who was again consulted, is of opinion that in view of the fact that vaccination work in the District is not a mere local problem but that it has an important bearing on the health of the country as a whole, it is highly desirable that the control over it should be placed in the hands of the local Sanitary Officer responsible alike to the District Board and the Health Department, the Presidents of the District Boards reserving to themselves the full power of exercising disciplinary control over the services they pay for, including Vaccinators and Sanitary Inspectors. In this view, he forwarded a set of rules for the guidance of Sanitary Officers in regard to their responsibility for vaccination work.

No. G. 9181-91—San. 7-27-107, dated 20th May 1932.

The question was placed before the Standing Committee of Representative Assembly and Legislative Council for Local Self-Government and Departments of Medicine, Sanitation and Public Health at their meeting on the 22nd March 1932, and it was resolved that the accompanying rules as revised by them be recommended for adoption for the present only in such of the Districts as have wholetime District Sanitary Officers.

Under Section 45 (1), Clause (*e*) of the District Board Regulation, the appointment and control of Vaccinators vest in the District Board subject to such exceptions and conditions as the Government may from time to time make and impose. In view of the strong reasons given by the Director in favour of placing the Vaccinators under the direct control of the District Sanitary Officers, Government direct that the scheme of placing the District Vaccination staff under the control of the District Sanitary Officers be given effect to for the present only in the Mysore and Shimoga Districts.

Under Section 100, Clause (*g*) of the same Regulation, they are also pleased to sanction the accompanying rules as revised by the Standing Committee for the guidance of the District Sanitary Officers of the above two Districts.

The Committee have also suggested that a recommendation should be sent to all District Boards to appoint sufficient number of reserve Vaccinators in their respective Districts in view of the next severe epidemic of small-pox apprehended sooner or later.

Government trust that the District Boards will take necessary action in this direction without loss of time.
